IMPROVED CRUSHING MACHINE.

C. H. GOODMAN'S

Latest Improvement in

MACHINERY FOR CRUSHING, GRINDING, AND TRITURATING

Stone, Minerals, Pyrites, and Ores of every kind (dry or wet), Granite, Flint, Concrete, Potters' Rough Stuff, Cement, Chemicals, &c.,

Also for Washing and Separating Metals from Ores, and Amalgamating Gold from Quartz.

This apparatus, from its many advantageous qualities, viz., Simplicity, Efficiency, and Cheapness, combined with Superabundant Strength, is rendered equal to the roughest work, likewise being comparatively light and easy of transit. The machine stands alone and

UNRIVALLED IN THE WORLD.

If the material is no required to be reduced finer than rough sand, or fine gravel, it may be worked or purchased without the Triturator, the same only being used in the production of fine powder. Likewise, the washing or amalgamating dish will only be needed when ores and quartz are in question.

The importance attached to this Machine is, that it is not applicable to one object only.—Its advantages may be summed up thus:—

1st.—The crusher consists of a horizontal ram, mounted loosely on an eccentric, by means of which a crushing and grinding movement is attained.

2nd—The material is reduced to its required size by simply setting the fixed face.

3rd—The two acting faces are moveable, and can be replaced in a few minutes at a trifling cost, which does not amount to one hundredth part the cost and trouble of rollers.

4th—Where the triturator is required, the material passes over a vibrating sieve (as seen in the illustration), the fine falling through, and the coarse passing into the dice hopper, where it becomes reduced to powder

5th—Where washing and amalgamating powers are required, the finely ground quartz is discharged into the dish containing quicksilver, wherein water is constantly poured, the whole being stirred by means of routers, and the mud and tailings passed into a sluice attached to the lip of the dish, intended to catch what precious metal may have escaped amalgamation.

It may also be necessary to state the Triturating discs are constructed in such a way as to admit of long wear, and will work to the last without the slightest injury to the quality or fineness of the material.

THE MACHINES ARE MADE IN THREE SIZES.

No. 1. Crushing 20 tons per day of ten hours, Road metal
No. 2. " 40 " " " Producing 4 tons of Quartz per 10 hours.
No. 3. Crushing 60 tons per day of ten hours Producing 8 tons of Quartz per 10 hours.

Extract from "THE ENGINEER," May 12, 1871, page 620.

"The ram-head works against a fixed toothed face, and, if there were nothing more, stones put into the hopper would be simply crushed between the two—much as in Blake's machine. But here the similarity ends. It has been found that what we may best term a chewing action materially facilitates the breakage of the stones, and this chewing action is obtained by mounting the ram-head and its thrust-bar or handle on an eccentric close to the head. The motion attained by the use of this eccentric produces the precise effect required very efficiently. All the arrangements are very simple and mechanical and the machine appears to have nothing about it to get out of order. We were much pleased with it."

Esquimalt Graving Dock.

THE GOVERNMENT OF BRITISH Columbia are prepared to receive Tenders for the construction of a Graving Dock, at the Naval Station, Esquimalt Harbor, under the guarantee provided in the Twelfth Section of the Terms of Union of this Province with the Dominion of Canada, with Section is in the following words:—

"The Dominion Government shall guarantee the interest for ten years from the date of the completion of the work, at the rate of five per cent. per annum, on such sums, not exceeding £100,000 sterling, as may be required for the construction of a first class Graving Dock at Esquimalt."

The Dock to be of masonry, and of not less than the following dimensions:—

Length on floor 370 feet,
Do. over all 400 feet,
Width between copings 90 feet,
Do. on floor ..... 45 feet,
Do. of entrance ..... 65 feet,

to afford a depth of water on the sill of not less than 26½ feet at high water springs, and to be substantially constructed to the approval of Government, upon a site to be provided by the person whose tender may be accepted.

Further particulars as to site, borings, &c., may be obtained from T. A. BURKLEY, Esq., Chief Engineer to Government, upon application in writing to the Chief Commissioner of Lands and Works.

Tenders must specify the time within which the Dock will be completed, and must be accompanied by drawings and descriptions showing exact dimensions, materials, and mode of construction of proposed Dock.

Tenders are to be sealed, superscribed "Tender for Esquimalt Graving Dock," addressed to the Chief Commissioner of Lands and Works, Victoria, British Columbia, and delivered at his Office before noon of the 15th day of November, 1872.

Persons who may consider the above guarantee to be insufficient, are at liberty to tender on the basis of such supplemental guarantee by the Provincial Government, or upon such other financial inducements, as they may suggest.

The Government do not bind themselves to accept the lowest or any tender.

Each tender must be accompanied by a Bond for a the Contractor, and two sufficient sureties, for the payment of £10,000 to Her Majesty, her heirs and successors, conditioned upon the due fulfilment of the tender which it accompanies, provided it be accepted within three months from the said 15th November.

By Command.
GEO. A. WALKEM,
Chief Commissioner of Lands and Works.
Lands and Works Office,

The Daily Standard.

Wednesday, July 10, 1872.

The Graving Dock.

Next to the construction of the Canadian Pacific Railway in importance to the commercial and industrial interests of this Province, is the early completion of the Graving Dock at Esquimalt. We are living on the very verge of an entire change in the commercial relations of this Province with the rest of the world. At present, and during the past, as a community the people of British Columbia are and have been dwelling in a condition of isolation which has operated greatly to their disadvantage, retarded the progress and settlement of the country, and to a great extent frustrated their best efforts to lay a solid foundation for the future development of its varied resources. Dependent as we have been upon the fitful and uncertain visits of worn out and condemned steamships for communication with San Francisco, for postal facilities and personal intercourse with adjacent countries, it could scarcely be otherwise than that our trade, commerce, and every branch of industry should droop and shrivel, and people become disheartened at the gloomy prospect before them. We say all this is about to be changed. From the moment the first sod is turned on the line of the Canadian Pacific Railway in British Columbia, we may look for a steady and rapid increase in the commercial and maritime trade of the Province. It needs no great stretch of the imagination, to foresee our docks lined with sailing vessels and steamships of the largest class discharging their freights of goods and railroad material; and in addition to the vast impetus which will be given to the shipping interests of local ports consequent upon the building of our railway, the kindred operations that will at the same time be under weigh on the other side of the Straits in connection with the building of the North Pacific Railway, will tend still further to increase the number of vessels engaged in the carrying trade in these parts. And with this greatly increased maritime trade will follow correspondingly greater necessity for a first-class graving dock where ships of any size may enter and undergo repairs. That such a dock will be built at no very distant period, is a question beyond a doubt. If not at Esquimalt, it will be on the Sound. If we are correctly informed, American capitalists are even now quietly laying their plans and collecting all the necessary data with a view to undertaking the construction of a dry dock at some suitable and convenient point within their own territory, and should our Government not display a little more vigor and and energy in reference to this matter than they are accustomed to do touching other subjects of vastly less importance, it is possible they may let the golden opportunity slip and live to see the dry dock planted on Puget Sound instead of in Esquimalt harbor. Should we get the start of our American neighbors in this matter, there is little probability for many years to come of seeing a dock built on the other side; but on the other hand, should they get the start of us in this great and costly enterprise, we may bid good bye to all hope of seeing a dry dock in British waters during the lives of the present generation at all events. Two dry docks within a few miles of each other could scarcely be other than very unprofitable investments for those who put their money in them, and hence the cost of construction would be enhanced in proportion to the risk capitalists would incur in consequence of the trade being divided between rival companies in such close proximity the one to the other. It is very much to be feared that the existing call for tenders for the construction of a graving dock at Esquimalt Harbor will be just as futile as the former one was—that the Legislature will meet about the close of the years when it will be ascertained that not a single *bona fide* tender by any responsible person or company has been given in, and thus the matter will be staved off for another year, if not forever. Neither plans nor specifications of the proposed dock are to be provided for the use of contractors, and even the site is "to be provided by the person whose tender may be accepted." And in addition to this, as if to remove all hope of obtaining a *bona fide* tender for the work, the Government gives it to be distinctly understood that they "do not bind themselves to accept the lowest or any tender." Now how are persons in San Francisco, New York, Montreal or London going to tender intelligently for such a work without any reliable data to base their calculations upon? Who is likely to go to all the expense and trouble of making drawings and supplying every detail as to dimensions, materials, and mode of construction of the proposed dock, with the almost certain prospect of their labors being cast aside without any compensation for the time spent in making the drawings and necessary calculations? It is impossible that these requirements can be complied with by parties willing to tender for the work without first sending out to this country qualified engineers to select a suitable site, make the necessary borings, and ascertain where and at what cost the requisite materials for construction can be obtained. True, the advertisement calling for tenders states that "further particulars as to site, borings, etc, may be obtained from T. A. Bulkley, Esq., Chief Engineer to the Government," but as a site is to be provided "by the person whose tender may be accepted," and as he has the whole "Naval Station, Esquimalt Harbor," in which to make a selection, we do not very clearly see how Mr. Bulkley can give particulars as to a site not chosen or as to borings that have never been made. In fact, the whole thing looks very like a bungle, and we shall be agreeably disappointed if it does not end in failure. Mr. Bulkley having been appointed Government Engineer, it should have been his duty to fix the site, make the borings, draw the plans of just the kind of dock required, prepare the specifications, furnish copies of the whole to agents duly appointed to receive them in the various centres where capitalists might be expected to offer for the work, and then advertise for tenders. Had that course been adopted no doubt many tenders would have been sent in, and there would then have been a hope of seeing the work begun early in the ensuing spring; but in the way the Government have gone about the matter, the chances are about one hundred to one that no tenders will be received and that nothing will be done for another year to come. In the meantime Uncle Sam may get to windward of us, and our much-talked of dry dock never be built.

S. DRIARD - - - - Proprietor

je6

To the Electors of Victoria District, including Victoria City, Victoria District, Esquimalt and Metchosin.

GENTLEMEN:—In a short time you will be called upon to elect two members to represent you in the House of Commons, and as many electors have expressed to me a desire that I should offer myself as a candidate for that honorable position, I now solicit your suffrages assuring you that if elected, no effort on my part shall be spared to advance your interests at Ottawa or to assist in legislating for the advancement of the whole Dominion.

Politically I am in favor of giving a generous support to the present Canadian Administration, and should strongly advocate the national importance of the Railroad being terminated at Esquimalt. I shall urge the establishing of a Quarantine Hospital at once, the opening of an Immigration Agency at Victoria, the building of a Lighthouse at the entrance to, and the Dredging of Victoria Harbor. I should endeavor if necessary to obtain an increased guarantee for the Dry Dock, and should point out the benefit and importance of completing the Railroad from the Pacific to Lake Superior, (at least) in the shortest possible time.

From present information upon the subject it appears there is little prospect of both Houses being in Session this year at the same time, but should it prove otherwise and should I be elected to the Commons, I should feel in honor bound, (although with great reluctance) to resign my present seat in the Local House and enable another representative to take my place.

I remain respectfully

Your obedient

Robert Beaven.

DEATH.

In this city, on the 9th inst., Catherine Baldon, aged 43 years.

The funeral will take place this day at 2 P. M. from her late residence, Flagnard street, near St. John's Church. Friends are invited to attend.

THE INTERNATIONAL BASE BALL MATCH.—The members of the Olympic Club and guests of this city, speak in the highest terms of their reception and treatment by the Washingtons and the citizens generally of Olympia during their late visit. The utmost good feeling was manifested during their stay, and everything possible was done to make their visit pleasant On the evening of the first match a complimentary dinner was tendered them at the dining-room of the Central Restaurant. The room was tastefully decorated with American and English flags. About fifty, members of the clubs and invited guests, regaled themselves at a really first-class entertainment. On the Fourth both clubs took part in the exercises of the day, and at the ball in the evening the clubs wore their uniforms, and every possible attention was shown. On leaving a large crowd gathered on the wharf, and as the steamer moved off cheer after cheer was given. On the steamer nearing the wharf three cheers were given to Capt. Starr, for his attention and favors shown on the trip.

FROM THE EAST COAST.—The steamer Maude arrived at 6 o'clock last evening from Nanaimo and way ports with the following passengers: Messrs. Williams, Hamilton, Gibbons, McNeil, Ball and J. Brown. At Nanaimo the ship Germania in tow of the tug Maestick arrived yesterday morning from Port Townsend, to load coal for San Francisco The Shooting Star completed loading on Monday evening and was towed to sea yesterday by the Maude. The steamer Idaho from Sitka completed taking in a full cargo of coal last evening, and was to sail for San Francisco direct this morning. The brig Robert Cowan was expected to finish loading at Departure Bay last evening. The steamer Gussie Telfair will take in coal at Nanaimo and would then proceed to Orcas Island to fill up with lime. Mr. Dawes of the stone quarry, Newcastle Island, had offered the bark Constitution (which has been lying at Nanaimo, for orders, for some time past), a charter to take a cargo of stone to San Francisco. The bark Union, at the quarry, was nearly loaded.

GRAIN CROPS IN EUROPE.—Next in importance to the knowledge that our own grain crops are abundant, is the probability as to our farmers securing a market for the surplus over from home consumption in Europe. On this point the *Mark Lane Express* of the 3d ult., the leading authority on grain matters in Great Britain, closes its weekly review of the grain trade in these words: "We are persuaded that all America can spare will be wanted for Europe." This conclusion is based on the variable nature of the late Spring and early Summer, the temperature having ranged from a frost of five degrees to tropic heat. Some lands have been flooded and others well nigh parched up. Russia and Hungary, the great granaries of Europe, are in fear of the wheat crop from long prevailing drouth. Taking all things into consideration, the harvest in Europe does not promise an abundance, nor even a fair average.—*S. F. Bulletin.*

ARRIVAL OF THE PROPELLER CALIFORNIA.—The steamship California which has been beached at Nanaimo for the past couple of weeks, undergoing repairs rendered necessary by her late mishap, arrived here yesterday between the hours of five and six p. m., and towed down the vessels which had been sent up to her assistance. Under the superintendence of Captain Walker who had had six men at work upon her, she has been thoroughly repaired and placed once more in a seaworthy condition. A new forefoot of the finest timber procurable, heavily braced with copper both inside and out, has been placed in her, and she is pronounced now to be a stronger vessel than previous to her accident. She will sail this afternoon for Bellingham Bay, where she will load with stone for Portland.

BOARD OF EDUCATION—ELEVENTH MEETING.—Pursuant to adjournment, the Board met yesterday at the usual hour. Present, Messrs. Marvin, Tolmie, Drake, Munro, Williams, Langley and the Superintendent—a full Board. Several communications from different parts of the Province were read and disposed of. Arrangements were made for another examination of teachers, and others proposing to become such, on Monday and Tuesday next at the Education office, after which several appointments to schools will be made. Board adjourned to Tuesday next.

THE CATHEDRAL.—The new Church is fast approaching a finished appearance. Within a week it is expected the walls will have been covered with the rustic, and the roof shingled. Fourteen workmen are engaged on the structure one way or the other, two have in hand the large East window. Those who are competent to pronounce, state that the material, and workmanship is very superior, and that the building will present a neat and handsome exterior when it shall have left the contractor's hands.

FIRE DEPARTMENT.—At a regular monthly meeting of Tiger Engine Company, No. 2, held last evening, the following gentlemen were elected as officers for the ensuing year: Michael Bart, Foreman; John Stephens, 1st Assistant; Thomas Patridge, 2d Assistant; Frank Sylvester, Secretary (re-elected); Henry Sanders, Treasurer (re-elected).

LILLOOET DISTRICT.—A private letter just received from this district states the crops are in splendid order, and will yield a first-rate harvest. Times were dull and but little news to report. Mr. Jamieson, M. P. P., was still detained at Lytton, through illness. Some good horse racing was expected at Clinton on Dominion Day.

FOR THE EAST COAST.—The steamer Sir James Douglas left at 6 yesterday morning for Comox, Nanaimo and way ports, with a considerable number of passengers among whom were the Bishop of Columbia, Chief Justice Begbie, Hon. A. R. Robertson, Messrs Kelly, Sayward, Pooley, Woolacott, Bishop and others.

STREET WATERING.—A new water cart is going the rounds of the streets which is effective in laying the dust and cooling the atmosphere. It has been built for the work, and holds nearly three hundred gallons.

The Indian Uprising at Skeena.

The following extract of a letter received in town yesterday, will explain:

"The Indian ranch at Kitsegoekly has been burned down from a conflagration of the adjacent woods. The natives attribute the blame to some whites who came up on the Otter, last trip, and who camped near their ranch. They (the Indians) say the whites left their fires burning, and a strong wind prevailing at the time, the surrounding timber was soon a mass of fire, and ultimately destroyed their houses. The Indians, feeling injured through this, desire to be compensated for their loss. Before we heard of the fire we sent up two canoes with freight. On arriving at the ranch about a dozen Indians, armed, stood on the spit. In reply to inquiries from Mr. Brown, the constable, who was in the canoe, the Indians stated they would not allow any goods to go further up the river unless they were indemnified for their recent losses. The canoe then returned to Kitweegar. Subsequently we engaged Indians to pack the goods to the Forks, by the trail, but when only a short distance out some friendly Indians were met who advised us to return—which we did."

The same letter states that the Sparrowhawk, with His Excellency on board, was daily expected at the mouth of the Skeena, and that the want of some one stationed there, empowered to meet disturbances of this kind, was much felt.

From the letter published yesterday it is gratifying to know that the difficulty above referred to has been temporarily arranged, pending some definite action on the part of the Government.

FURTHER DETAILS.

A canoe arrived in town, yesterday, from Port Essington, leaving that port on the 27th ult., and we learn from one of the passengers further particulars of the uprising. A Government officer, Mr. Brown, on reaching Kitzasquickley rancherie, found that it had been burned down some days before. The Indians stated that it was destroyed by the camp fire of white men proceeding to the mines, and that they were determined that no white man, or freight for white men, should pass there this summer. Mr. Brown represented that they had better allow the goods to pass, and that he would do what he could with the Government to have them paid for their losses. The Indians then replied that he could proceed, but that no goods could be sent up. On proceeding up towards the Forks he found from fifteen to twenty men, armed with muskets, on the right bank of the river, and several others on the left bank. They gesticulated and ordered him back, when he returned to the next village below. Before reaching that point he had dispatched an Indian with a note to Mr. Hankin (C. & H.) succinctly stating the facts above narrated. The next morning Mr. Hankin came down with a party of twelve armed men, in a canoe, and had a long wawa with the Indians, which ended in the same manner as Mr. Brown's conversation had done; with this exception, that (as Mr. Hankin states) two shots were fired in in the direction of his canoe, which he believes were aimed at them. Mr. Hankin then joined Mr. Brown at Kitcumgar, and determined that if a deputation of the chiefs who had volunteered to go up and try to arrange matters at the camp burned, did not succeed before noon on the following day, he would pack his goods through by land. The deputation did not return within the time specified, and the goods were accordingly packed over the trail half a day's journey. Just before dark, however, the party were overtaken by one of the deputation, who advised Mr. Hankin not to go further unless he was ready for a fight. Mr. Hankin was guided by the counsel given him, returned and stored his goods.

Mr. Brown then started at once for the mouth of the river. At the request of the inhabitants he engaged a canoe and brought the news to lay it before the Government.

On the way down they were detained by fog two days in Queen Charlotte Sound, and had head winds nearly the whole trip. The Idaho passed them four miles northwest of Alert Bay. The G. S. Wright was met on Saturday last; and the Rozer at 1 o'clock a. m. on Sunday. The canoe called in at Nanaimo on Sunday night, arriving in Victoria at 4.30 yesterday morning. There had been no arrivals from the mines, nor is there any news of consequence to report.

It is probable that a gunboat will be dispatched to the river at once, and that the Lieutenant-Governor will go up, in order to have inquiry made, and to have matters with the Indians placed on an amicable basis.

WE understand the Olympic Base Ball Club are about to receive a challenge from a City Nine to play a match game. The Olympic will accept.

EXPRESS.—Messrs. Wells, Fargo & Co.'s express, for California and the East per stmr. Prince Alfred, will close this morning at 11 o'clock.

MR. BULL'S LECTURE.—His Excellency the Lieutenant Governor has kindly extended his patronage to Mr. Bull's lecture of Monday evening.

FOR THE MAINLAND.—The Enterprise left at 10 o'clock, yesterday morning, for New Westminster, with about a dozen passengers and a small freight.

LEGAL.—The new firm of Robertson & Johnson has taken offices in the brick building, Langley street, opposite the Police Barracks.

THE Emma will leave Brodrick's wharf at noon, to convey passengers, freight, etc., to the Prince Alfred bound for San Francisco.

☞ We beg to acknowledge receipt, from friends, of a late copy of the *Jamaica Instructor*, and the *Honolulu Advertiser* of April 25th.

THE programme of sports, with prizes, of French Benevolent Society's picnic appears in this morning's issue.

DUE.—The H. B. Co.'s ship Prince of Wales, from London, is 152 days out to day.

NO MAIL.—The Prince Alfred will not take a mail this trip.

FOR THE SOUND.—The North Pacific left at noon yesterday for Olympia and way ports.

THE California is due this morning, 4½ days out from San Francisco.

THAT original cheap and easy Shaving shop at Fred Payne's, on the sunny side of Johnson street. *

Mrs. Frost.

Victorians will remember Mrs. Frost, who, with her travelling companion, last winter, victimized right and left so many tradespeople in this city. The following from the Portland *Bulletin* and S. F. *Alta* fully depict her:

"Our readers will remember Mrs. J. Blakesly Frost, who raided through the Willamette valley last Fall, in the capacity of an historian lecturer, who dosed up *ad nauseam* with opposition to Woman's Rights; who went from here to Victoria, where she tickled the Colonial British by predicting the "Downfall of the United States." She won the Victorians' confidence, got credit for whole heaps of stuff, and left her creditors mourning. She has lately turned up in San Francisco, where she wanted to make an anti railroad speech. The *Alta* of the 27th inst., thus tells her experience in that city:

Mrs. Frost, the Great North American lecturess, opposed to everthing except twenty dollar pieces, came too early in the season of aspiring genius. She came with a bright, clear, promising sky, that foretold an early Spring and abundant harvest of thoughts; but, alas! for the young shoots and ambitious shooters, she fell from the tender mercies of the people and nipped a budding reputation that had given evidence of unfolding in future into one blossom of truth and yielding a harvest of at least one grain of common sense. Tuesday evening she warmed the people into admiring, confiding and expanded hearts. Wednesday evening they unfolded their cravats, their "Sunday-go-to-meetin'" clothes, and their credulity, and thus with the luxuriant young foliage of misplaced confidence, they put forth their tendrils in the direction of Platt's Hall. They met a chill blast and a frost that they expected not. All was dark and dreary. The hall offered neither light nor shelter, and they were forced to depart in blighted columns. The clerk of the weather said that he had despaired of seeing green leaves upon the field so he had concluded to leave himself, and he coated his conscience with a dose of privately administered Frost.

The whole story will be found in the following note from Mrs. J. B. Frost:

"Mrs. J. B. Frost desires her compliments to the Editors of the *Alta California*, and to state that in consequence of an altercation between her agent and the proprietors, Platt's Hall was closed this evening, and the delivery of her Railroad speech postponed until a future date, of which due notice will be given.

"Wednesday, June 26, 1872."

Comments on the Great Boat Race.

LONDON, June 11.—The city press comment as follows on the international boat race yesterday:

The *Times* says: "The simple fact is that the Americans have not yet learned, or they have lost, the true style of rowing. They neglect the cardinal principles of effective rowing. The wonder is they were able to make so gallant an effort with such a defective method. We hope the Americans will learn how to row, then they will put our oarsmen to severer tests."

The *Post* says: "The result of the race shows we have nothing to learn from Americans. The latter were inferior in physique and style. They had everything their own way. The choice of water was given them; delays were conceded, and the absence of coxswains agreed to, and although they rowed two strokes per minute more than the Londoners, they were easily outstripped. The result convinces us that the English style is the best now practised." It fears the American press will exaggerate the importance of the unfortunate foul which the Atlantas had toward the close of the race.

The *Telegraph* says: "This race illustrates our national energy. Stalwart strength and dogged adherence to the ways we deem best hold their own against the dash and daring of our American kinsfolk. Both crews belong to the Saxon race, which is the only one which has the nerve and pluck to preserve manly sports. When the tables are turned, and our neighbors across the water win a victory, we shall regard it as an English triumph."

The *Standard* declares: "A more hollow affair was never witnessed. The Americans were not good enough to win an ordinary country regatta. The effect will be to prevent a recurrence of international matches for some years. The moral to be drawn is, that American oarsmen must learn the first elements before coming 3,000 miles to row."

General Dispatches.

BOSTON, July 1.—To-day was devoted mainly to Irish music, and drew 20,000 persons. A fantasia was played from Faust, by the French Band, and Madame Pazreka Leutver gave airs from the "Magic Flute." The performance of the Irish Band, under Clemens was the feature. The Irish musicians showed their skill under their accomplished leader, who had them in perfect training, and kept them on the stage for over an hour. The enthusiasm was immense, and overtopped that aroused by the "Anvil Chorus" with its guns and strikers. "The Harp that once through Tara's Hall" was sung by a chorus and by audience. The Grenadier Band renewed the enthusiasm by performing in fine style the "Oberon Overture," and, on an encore, gave several American favorite airs The Grenadier Guards return to England on Saturday night.

NEW YORK, July 1.—The cost of the East river bridge is estimated at $9,500,000.

Mercury reached 98° in the shade to-day.

ST LOUIS, July 1.—The Kansas City *Times* says: "Miss Amanda Barber, who married a Sioux chief in 1867 and went to Dakota Territory with her husband as a missionary, arrived in the city by the steamer Forentile, from Fort Benton, on Friday last, after spending three years with the Sioux suffering gross indignities, and being obliged to perform the most menial service. She attempted to escape, but was captured and beaten nearly to death by her husband and sold to a Cheyenne chief for three ponies She was taken north in 1870 and remained with the Cheyennes until this Spring, when she escaped to Fort Benton. Miss Barber left Kansas City on Friday for her home in Milford, Massachusetts."

THE ONLY COMPLETE BOOK-BINDERY NORTH OF SAN FRANCISCO.—The undersigned is prepared to turn out a superior class of work. Magazines, newspapers, etc., bound with dispatch. The most difficult forms of ruling done. Cheques or receipt books numbered and perforated. Charts or maps mounted on linen suitable for the pocket, and drawing paper mounted by the yard or in sections. ROBERT T. WILLIAMS, at T. H. Hibben & Co.'s.

☞ Memory presides over the past. Fell's Coffee over the present. The first lives in a rich temple hung with glorious trophies, and lined with tombs, but Fell's Coffee has but one shrine and that is every breakfast table Its aroma walks the earth like a spirit and can be found for sale at every respectable dealer in British Columbia. Beware of spurious imitations. 1y *

WE wonder what induces David Green the clothier of Government street to advertise, as everyone is aware that he keeps the best fashionable made clothing store north of San Francisco. *

DR. ADAMS, Oculist, Aurist, and Physician for chronic diseases, will be at the Pacific Hotel, Olympia, from June 29th until the 8th of July, and at his apartments, corner Third and Morrison streets, Portland,—from the 12th of July until the 12th of August. *

Ocean Telegraph Company.

INTERVIEW WITH THE CANADIAN MINISTRY.

OTTAWA, June 7—A large deputation consisting of members of both Houses of Parliament, among whom were Messrs. Chauveau, Fortin, E. M. Macdonald, Blanchet, Keeler, Grover, Cameron (Inverness), Brousseau, McGreevy, Bown, Ross (Victoria), Tourangeau, Simard, Wright and Chipman, waited upon the Government this afternoon at one o'clock in the office of the Minister of Justice There were to receive the deputation Sir John Macdonald, Sir Francis Hincks, Messrs. Mitchell and Pope.

Mr. Chauveau said the deputation desired to submit their views with regard to the laying of an ocean telegraph cable from Great Britain, by way of the Faroe Islands and Greenland to the coast of Gaspe, in Canada The object of the proposed cable was to make the Dominion independent of other lines, and at the same time to benefit the Maritime interests of the country by providing telegraph facilities along the shore of the Strait of Belle Isle and the Gulf of St. Lawrence.

Mr. Fortin explained the route of the proposed telegraph line. The cable was to be laid from the coast of Scotland to the Faroe Islands, thence to the southern coast of Greenland, where there was to be a station; thence through the Straits of Belle Isle to Larse aux Blanc Sablons on the Labrador coast, where there was to be another station; thence to Anticosti, where there would also be a station, and thence to Gaspe Bay where connection would be made with the Canadian land system. Gen. de Rassloff, one of the principal promoters of this line, who had lately been in Ottawa, was interested in the Northern European Telegraph Company, which was one of the important telegraphic organizations in the world, and which had lines from Denmark through Sweeden, Russia and Siberia into China, and thence by cable to Japan. This company was aiding another company which intended to lay a cable from Land's End to New York. By its influence this latter company, which was called the Great Western had consented to make arrangements with their Canadian Company by which, if this company succeeded in laying a cable from Europe to Canada, the two companies would have a common purse and work together in opposition to the existing lines, which were under the control of Cyrus W. Field and other Americans, who, having possession of all through cables across the Atlantic, charged what tariff they pleased. The Western Company engaged that when in perfect working order, it would reduce the tariff for messages to and Europe from one half, so that instead of two pounds sterling the rate for messages of ten words would be only one pound. He (Mr. Fortin) pointed out the advantage which the new cable, with its several stations in the gulf, would be to the shipping interests of Canada by making the navigation more secure, saving losses by wrecks on account of the facility which would exist for summoning aid and reducing the rate of insurance. At present if a wreck occurred, three weeks or a month elapsed in many cases before intelligence was received of it at Quebec. He calculated that there would be a saving of at least one-fourth of the money paid for insurance, which allowing only for risks upon one-half of the value of the vessels and upon the goods imported and exported throughout the Gulf, would amount to $225,000 annually. He believed that the project would not succeed unless it had the aid of the Canadian Government, and in view of the completion of the Pacific Railway, and the vastly increased trade through the Canadas which would be developed, when this the shortest route between Europe and the Orient was opened, he thought it advisable that such aid should be afforded.

Sir F. Hincks said no one had taken a warmer interest in the project than he had. The difficulty, however, was that although he had many interviews on the subject with Gen. de Rassloff, one of the principal promoters, they had never been able to hit upon any mode which the Government felt they could properly recommend to the House for assisting it. The first suggestion that had been made was to guarantee a certain rate of interest, five per cent., upon the capital stock, which had been pretty accurately estimated at £800,000 sg.; the guarantee thus being £40,000 per year, or about $200,000. There were inseparable objections, and in this all the members of the Government agreed, to the plan of a guarantee; for the directors of a guaranteed company, being beyond the control of the Government, might be depended upon so to manage that whatever revenue was derived would be expended either in extending the lines or in such other way as to make it necessary for the Government to pay the guarantee. (Hear, hear.) The next proposition was for the Government to give a bonus of $100,000. He (Sir F. Hincks) had endeavoured to get statistics as to the amount of telegraphic business done through the existing cables and the probable amount which would be done by this line, but the promoters had not been able to put that information before the Government. If they had such data they would be better able to judge as to the prospects of the scheme. General de Rassloff had informed him as to the manner in which Russia had assisted a somewhat similar enterprise. It was by paying a subsidy on every message transmitted by the cable to a certain point, thus securing the Company an income of $100,000 per annum, and if the business increased beyond that figure, the subsidy was reduced in proportion until it was extinguished. That was the best plan that had been suggested, but the Government in the absence of information as to the amount of business likely to be done, had not felt justified in recommending it to Parliament. Before General De Rassloff's visit to Canada, about a couple of months before the meeting of Parliament, Mr. John Young of Montreal, who had been acting as principal promoter of the scheme, had proposed that if the Government would guarantee business to the amount of $100,000 a year, the Company would be able to lay the cable. He (Sir F. Hincks) had been very favorable to that proposition, and having spoken to his colleagues, there was a general disposition on the part of the Government to approve of it. When Gen. de Rassloff came here, however, he said that that would not answer at all; that the company could not proceed unless greater aid was given to it. He (Sir Francis Hincks) was still in correspondence with Gen. de Rassloff, who was now in New York, and who in his last letter seemed to wish to return to the proposition of the Government guaranteeing a certain amount of business. It had occurred to him that a very favorable arrangement might be made by the Government undertaking to supply the Press of the country with messages from Europe, by which means considerable business would be secured for the line. If an arrangement of that kind could be made, very great good would be done to the Press and the public of Canada, because, as they all know, under the present system all the European news published here came through New York, was prepared with a special regard for American readers and was given to the Canadian press in the shape the American reporters saw fit. The propriety of doing something in that direction might well be taken into consideration; but in the absence of information the Government had not felt themselves justified in accepting and recommending to Parliament either of the three plans placed before them.

Mr. Fortin mentioned the case of a wreck in the Gulf where if there had been telegraphic facilities a vessel and cargo worth $50,000 might have been saved by a telegram costing only twenty-five cents. In reply to Mr. Chauveau,

Sir F. Hincks said that the proposal which Gen. de Rassloff had at first thought quite unacceptable, he had since expressed a desire should be made by the Government.

Sir John Macdonald announced to those present that he had received a telegram which satisfied him beyond doubt that all difficulties between Great Britain and the United States had been removed.

The deputation then withdrew.

DR. CHING FUN—A CARD—EDITOR STANDARD:—Through the medium of your paper I want to state the very great good that has been done me by Dr. Ching Fun of this city, next door Kwong Lee & Co. For 24 years I suffered with neuralgia on the brain, which baffled the skull of three first-class American physicians. Lattery bronchitis attacked my right lung, and my eyes became painfully inflamed. Despairing of ever being cured I placed myself as a last resort in the hands of Dr. Ching Fun, and after five months treatment I am a well man and feel that I cannot sound the eminent Chinese gentleman's praises too loudly, so that all my countrymen similarly affected may visit and find relief. Respectfully,

JOHN HENTON, of Kentucky, U. S.
Victoria, 22d Sept., 1870. ma23
